SUMMARY

As a highly motivated and detail-oriented junior software developer with over 6 months of hands-on experience in **PHP, Laravel, HTML, CSS, and JavaScript**, I am passionate about building dynamic and user-friendly web applications. My experience includes developing and maintaining backend systems using Laravel, creating responsive front-end designs with HTML and CSS, and implementing minor JavaScript functionalities to enhance user interactivity. I am eager to contribute my technical skills and enthusiasm to a collaborative development team, where I can continue to grow my expertise and contribute to innovative projects.

KEY ACHIEVEMENTS

 Your Achievement

Describe what you did and the impact it had.

EXPERIENCE

Worked as an Intern

Custom Software 08/2024 - 11/2024 Lahore

- Gained hands-on experience in **developing and maintaining web applications** using **PHP with Laravel**. Successfully transformed client requirements into **user-friendly, functional websites**, ensuring seamless performance and responsiveness. Proficient in building and customizing backend functionalities to deliver tailored solutions that meet client needs
- Practiced troubleshooting, debugging, and optimizing code, and developed database-driven applications to ensure performance.

Junior Software Developer

Custom Software 12/2024 - Present Lahore

- Created and maintained PHP APIs, ensuring effective and secure backend communication.
- Performed comprehensive API testing with **Postman** to verify functionality and reliability.

EDUCATION

Bachelor of Computer Science

University of Management and Technology(UMT)
01/2022 - 01/2026 Lahore

- I am currently completing my degree in Computer Science demonstrating a strong commitment to academic excellence with a consistent Cumulative Grade Point Average (**CGPA**) of **3.12**

Intermediate(FSC)

Punjab Colleges 01/2020 - 01/2022 Lahore

PROJECTS

Restaurant Website

- Developed a fully responsive **Restaurant Website** using **HTML and CSS**, ensuring a seamless user experience across all devices. Designed an intuitive and visually appealing frontend interface, focusing on clean layouts and smooth navigation to enhance user engagement.

Online Complaint Management System

- Developed an **Online Complaint Management System** using **HTML, CSS, minor JavaScript, and Laravel**, featuring two portals: **Client and Admin**. Clients can submit complaints through the client portal, which are then forwarded to the admin portal for review and resolution. The system ensures seamless communication, efficient complaint tracking, and a user-friendly interface for both clients and administrators.
